Profile

I am a front end developer, who values quality and accuracy of all that surrounds me. Being extremely detail oriented and putting my passion to work, this is my way of improving the world one pixel at a time. I love what I do and eager to learn new technologies.

Experience

Software developer, Signal Zero; San Francisco, CA – 2015–present

As part of software development team I'm responsible for building and maintaining software in the environment that was set up by famous Pivotal Labs (agile development, pair programming, continuous deployment, test-driven development, short one-week iterations).

Web developer, Freelance; San Francisco, CA – 2014–2015

Developed and designed personal and portfolio websites.

Release engineer, Nokia; Cambridge, MA – 2013–2014

As part of the Here Maps application team, I was responsible for bi-weekly releases of the application as well as maintaining and improving the existing release process.

Web developer, Vedomatic; Cambridge, MA – 2010–2013

Worked closely with the software development team for online custom publishing websites, I created fluid templates with W3C valid HTML/CSS based on provided design and prepared pages for PHP developers.

Junior web developer, Ailove – 2010

Developed HTML/CSS templates for advertising websites based on provided design. Worked in a team with tough delivering schedule.

Education

Studied fashion design at Novosibirsk Institute of Technology (Moscow State University of Design and Technology Branch)
